A SUBSIDIARY OF **STARK INDUSTRIES**

For Immediate Release:

**ACCUTECH: A SUBSIDIARY OF STARK INDUSTRIES UNVEILS PROTOTYPE 'HAZTECH' ARM
- FULL EXOSKELETON TO DEBUT AT STARK EXPO 2010 -**

AccuTech: a subsidiary of Stark Industries has today given us a glimpse of the latest breakthrough in anthropo-robotics - the 'HazTech Exoskeleton'.

Using revolutionary hyper-sensors and nano-hydraulic technology, the exoskeleton is able to detect and amplify body movement. Covering over 80% of the human body, it also protects its wearer from high impact and extreme temperatures.

In a video released today at www.starkexpo2010.com/accutech/ a prototype arm is shown in action, with the full exoskeleton due to be unveiled next month at the hotly anticipated Stark Expo 2010.

Charles Healey, CEO commented: "Putting aside the obvious commercial applications of HazTech, our priority is to unlock its humanitarian potential. By better protecting the lives of peacekeepers and emergency rescue teams, we can help them save the lives of others."

- ENDS -

Notes to Editors:

Once a small California-based research and development firm founded by then CEO Gilbert O'Connor, AccuTech: a subsidiary of Stark Industries has grown to become an international knowledge-based group with 4,800 employees in over 30 countries.
